

36th International Geological Congress (IGC) rescheduled from 9-14 November 2020 to 16-21 August 2021.

Given the current status of the Covid-10 pandemic, it appears unlikely that the 36th IGC can be held as rescheduled.

Accordingly, the Local Organizing Committee requested and the IGC Committee (IGCC) approved revised dates of 16-21 August 2021.

Scheduling was constrained by the limited availability of the venue site in New Delhi in 2021.

The IUGS Executive Committee and its constituent groups will work hard to ensure the success of the rescheduled Congress.
